Note 1. Organization and Significant Accounting Policies

<u>Organization and Line of Business</u>

Tonogold Resources, Inc., a Delaware corporation, is a result of the acquisition of Point Loma Partners, Inc. "PLP" by Gamesboro .Com, Inc. "GB" (formerly Alliance Trophy Club, Inc.) as of May 1, 2002. The Company changed its name to Tonogold Resources, Inc. in 2004.

In May of 2005 the Company formed a subsidiary, Prospect Uranium, Inc. which is in the uranium exploration business. Tonogold owned approximately 39.1% and controlled the operations of Prospect Uranium. On December 28, 2011 Tonogold issued 9,024,673 shares to acquire the all of the outstanding Prospect shares and immediately dissolved Prospect. The acquisition has been accounted for as an amalgamation in accordance with Accounting Standard 14 and pooling of interest accounting has been applied. As per SFAS No. 141 Business Combination, purchase accounting does not apply when a combination between businesses under common control are merged into one company.

Tonogold has been primarily engaged in the acquisition, exploration and development of mining properties, however in 2008 the company revised its business model and now focuses on obtaining and proving out mining properties for sale to other mining development companies in order to generate income in the form of cash, stock, joint venture interests, and royalties. In addition, the Company will do consulting with mining development companies.

During 2009 and continuing through the present the Company has generated revenues from the sale of mining properties taking stock, cash and royalty percentages and consulting fees.

<u>Basis of Preparation</u>

The accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles for financial reporting and pursuant to the rules and regulations of the Securities and Exchange Commission ("Commission"). The prior six months ended June 30, 2011 has been restated for the merger of Tonogold and Prospect as of December 28, 2011.

<u>Estimates</u>

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.

<u>Revenue Recognition</u>

The Company recognizes revenue from the sale of leases at the time the lease is sold and income from consulting agreements as earned. Royalty income is recognized as received.

<u>Cash and cash equivalents</u>

The Company considers all highly liquid investments with an original maturity of three months or less as cash equivalents.

<u>Property, Plant and Equipment</u>

Property, plant and equipment is stated at cost and depreciated using the straight-line method over the estimated useful life of the assets, which is three to ten years.

<u>Long-Lived Assets</u>

The Company accounts for intangible assets in accordance with Statement of Financial Accounting Standards (SFAS) No.144 " Accounting For The Impairment or Disposal of Long-Lived Assets" and Statement of Financial Accounting Standards (SFAS) No. 142 "Goodwill and Other Intangibles".

Comprehensive gain (loss)

The Company accounts for Comprehensive gain or loss in accordance with SFAS No. 310. Any change in the market price of shares held for investments are recorded as a comprehensive gain or loss. Comprehensive income or loss is reported in the Statement of Stockholders' Equity.

Income Taxes

The Company follows SFAS No. 109 "Accounting for Income Taxes" (SFAS No. 109) for recording the provision for income taxes. Deferred tax assets and liabilities are computed based upon the differences between the financial statement and income tax basis of assets and liabilities using the enacted marginal tax rate applicable when the related asset or liability is expected to be realized or settled. Deferred income tax expense or benefit is based on the change in the asset or liability each period. If available evidence suggests that is more likely than not that some portion or all of the deferred tax assets will not be realized, a valuation allowance is required to reduce the deferred tax asset to the amount that is more likely than not to be realized. Future changes in such valuation allowance are included in the provision for deferred income taxes in the period of change.

Deferred income taxes may arise from temporary differences resulting from income and expense items reported for financial accounting and tax purposes in different periods. Deferred taxes are classified as current or non-current, depending on the classification of assets and liabilities to which they relate. Deferred taxes arising from temporary differences that are not related to an asset or liability are classified as current or non-current depending on the periods in which the temporary differences are expected to reverse.

Minimum State income taxes are recorded as paid.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period's presentation.

Going Concern

The consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As of June 30, 2012 the Company had cash of $15,549 and negative working capital of $165.798. The Company had net loss from continuing operations of $1,130,028 for the six months ended June 30, 2012, that included a loss of $897,000 on the sale of the shares received for the sale of Secure Energy, LLC.

The accompanying financial statements do not include any adjustments relating to the recoverability and classification of asset carrying amounts or the amount and classification of liabilities that might result should the Company be unable to continue as a going concern.

Mining Property costs

The Company incurs costs on activities that relate to the securing of mining leases. The costs are capitalized as investments in projects until the lease can be sold or until the lease proves to be of no value and expensed.

Stock-Based Compensation

Statement of Financial Accounting Standards No. 123 (Revised 2004), "Share-Based Payment" ("SFAS 123R"). SFAS 123R requires that compensation cost related to share-based payment transactions be recognized in the financial statements. Share-based payment transactions within the scope of SFAS 123R include stock options, restricted stock plans, performance-based awards, stock appreciation rights, and employee share purchase plans. The provisions of SFAS 123R, as amended, are effective for small business issuers beginning as of the next interim period after December 15, 2005.

The Company has elected to use the modified–prospective approach method. Stock-based compensation expense for all awards granted is based on the grant-date fair values estimated in accordance with the provisions of FAS 123R. The Company recognizes these compensation costs, net of an estimated forfeiture rate, on a pro rata basis over the requisite service period of each vesting trenched of each award.

The Company considers voluntary termination behavior as well as trends of actual option forfeitures when estimating the forfeiture rate.

The Company measures compensation expense for its non-employee stock-based compensation under the Financial Accounting Standards Board (FASB) Emerging Issues Task Force (EITF) Issue No. 96-18, “Accounting for Equity Instruments that are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services”. The fair value of the option issued is used to measure the transaction, as this is more reliable than the fair value of the services received. The fair value is measured at the value of the Company’s common stock on the date that the commitment for performance by the counterparty has been reached or the counterparty’s performance is complete. The fair value of the equity instrument is charged directly to compensation expense and additional paid-in capital.

Basics and Diluted Net Loss Per Common Share

The Company computes per share amounts in accordance with SFAS No. 128, “Earnings per Share”. SFAS No. 128 requires presentation of basis and diluted EPS. Basic EPS is computed by dividing the income (loss) available to Common Shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS is based on the weighted-average number of shares of common stock and common stock equivalents outstanding during the periods.

Note 2. Notes Payable

The Edwards note of $50,000 was assumed by AEFI when it acquired Secure Energy LLC in March 2011.

Note 3. Shareholder loans

The Company paid $52,850 to retire loans from shareholders leaving a balance of $800. The shareholder loans are non-interest bearing and due on demand.

Note 4. Income taxes

The components of the deferred tax asset are as follows:

		June 30, 2012		December 31, 2011
Deferred tax assets				
Net operating loss carry-forward	$	3,866,000	$	3,403,000
Valuation allowance		(3,866,000)		(3,403,000)
Net deferred tax assets	$	-	$	-

The Company had available approximately $9,430,000 at June 30, 2012 and $8,300,000 at December 31, 2011 of unused Federal and California net operating loss carry-forwards that may be applied against future taxable income. These net operating loss carry-forwards expire through 2032 and 2022 for Federal and State purposes, respectively. There is no assurance that the Company will realize the benefit of the net operating loss carry-forwards.

SFAS No. 109 requires a valuation allowance to be recorded when it is more likely than not that some or all of the deferred tax assets will not be realized.

Reconciliation of the differences between the statutory tax rate and the effective income tax rate is as follows at June 30, 2012 and December 31, 2011 respectively:

Statutory rate	35%
State taxes, net of Federal tax benefit	6%
Net operating loss carryforward	41%
Effective tax rage	0%

Note 5. Project investments

The Company is now leasing and exploring properties, not for in-house development, but for sale or joint venture to mining development companies. The Company accumulates the expenses on these leases until sold or, if they do not prove out, then the exploration costs are written off.

The projects initiated thus far are as follows:
